

ECO JUTE—BIODEGRADABLE GROUND COVER

Product Guide

Description:

Eco Jute is a non-woven jute fibre net designed to stabilize soils against erosion prior to planting. The properties of Jute make it the most natural, affordable and practical means to control the soil and prevent run-off on sloped areas. The biodegradable ground cover must be laid on a clean and worked surface. Certain weeds can pierce through the biodegradable ground cover: Bindweed - Couch grass - Rumex.

• Applications:

- Slopes
- Embankments
- Sports grounds
- Golf courses
- Sand dune stabilization
- Drainage ditches
- Hydro seeding
- Stream bank stabilization
- Extreme erosion areas

Features:

- 100% biodegradable over a period of 18-24 months
- Natural material 90% jute and 10% hemp
- Permeable and environmental
- Protects the soil surface from water and wind erosion
- Accelerates vegetative development
- Promotes growth of plant species, grass and ground cover

ECO JUTE—BIODEGRADABLE GROUND COVER

Product Guide

TECHNICAL INFORMATION

Surface Mass:	800gr/metre squared +/- 10%
Thickness:	8mm +/- 10%
<u>Non woven:</u>	Yes
Life span:	12 to 18 months
Length:	25 linear metre rolls +/- 10%
Width:	100 –200cm +/- 10%
Flammability:	Flammable product

Composition : 90% jute and 10% hemp
