Green Roof Aluminium Edging

Product Guide

LANDSCAPE DEPOT

Description:

Aluminium edging designed specifically for use on green roofs.

This aluminium roof edging system can be used either as an edge restraint or to separate different materials. It features vertical slots that allow drainage across the roof which prevents water accumulation. It is simple and quick to install.

Applications:

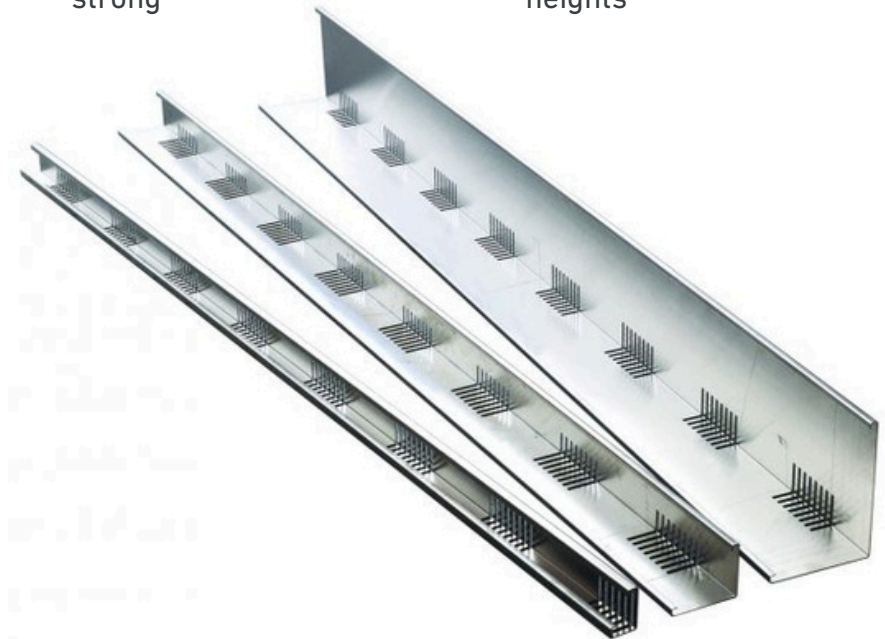

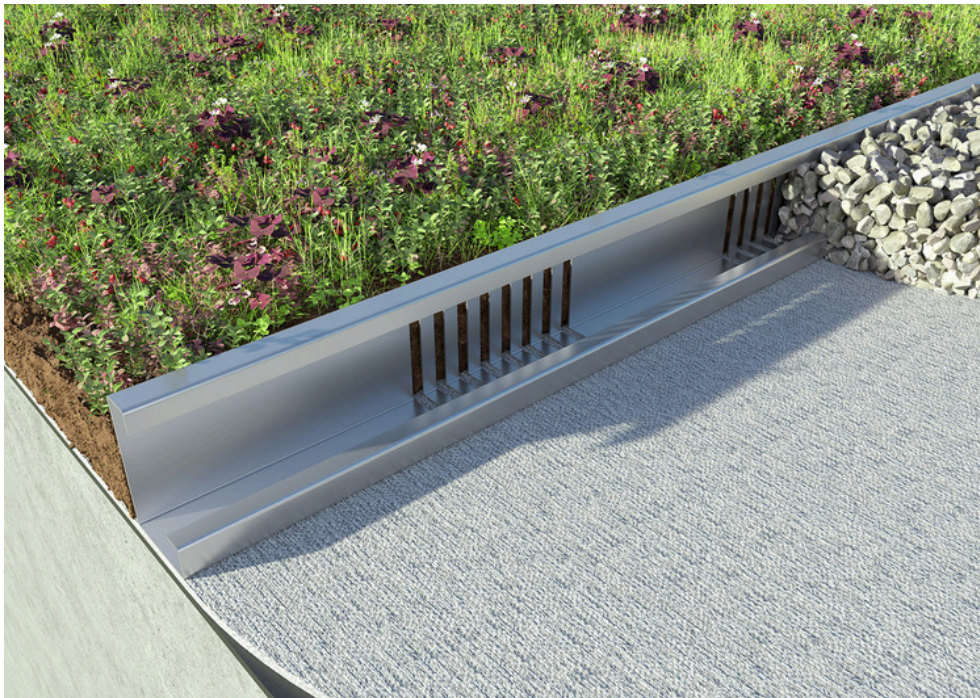

- Green Roofs
- Above car parks
- Terraces

Features:

- Vertical slits for lateral drainage
- Aluminium alloy construction
- Very durable
- Very resistant in extreme weather conditions
- Flexible, lightweight and strong

Features:

- Easy to cut
- Easy to install
- Does not rust, rot or crack
- Non toxic, non magnetic
- Non sparking
- Environmentally friendly
- 100% recyclable
- Available in different heights
