

TREE BASE - TREE TRUNK GUARD

Product Guide

Description:

The Treebase efficiently protects trees from damage caused by strimmers, lawn mowers as well as rodents.

Very easy to use, they interlock on themselves to fit around the base of the tree.

Using the same interlocking tab you can join multiple units together to go around any size tree at all.

Thanks to the Grill design the TreeBase provides sufficient air circulation, eliminating the risk of mould or fungi development due to trunk constriction.

Features:

- Semi rigid recycled PVC.
- UV resistant and weather proofed.
- 3mm thickness.
- Ultra resistant to shocks, cuts, scrapes....
- Adjustable diameter
- Excellent protection of the trunk
- Quick and easy to install.
