

Since 1996, our partners has been designing and developing the mulching membranes of tomorrow. Here are our 3 bio-based, biocompostable and biodegradable membranes.

Biodegradable PLA

Biocompostable

LongLast

Biodegradable

EcoJute

Biodegradable

Needle-punched Calendered

Extruded

Bio-based solution

Mechanisable

Good economic alternative to synthetic groundcover

Easy to install as these membranes are lighter

Large widths available

Woven jute coated with vegetable oil concentrated in lignin

100% recycled jute

Durability of 24–36 months

High mechanical resistance

Mechanisable

Easy to cut

Ok Biobased
4 stars certified

100% recycled jute

Durability of 18–24 months

High mechanical resistance thanks to the woven jute grid

Compressed rolls delivered on a core

Logistical savings on storage and transport
